

XI Conference – European Congress of Methodology

Wednesday 23 July 2025

Session 6 : "Structural models and complex data analysis" - Faculty of Social Sciences and Communication. (The Pyramid)/13 - Room (08:30 - 10:00)

time	[id] title	presenter
08:30	[57] Standard Error Estimation in the Local Structural-After-Measurement (LSAM) Approach	CAN, Seda
08:45	[58] The Structural-after-Measurement (SAM) approach: updates and extensions.	ROSSEEL, Yves
09:00	[110] A simulation study comparing structural-after-measurement versus traditional approaches to estimate nonlinear effects in structural equation modeling	VIEIRA, Felipe
09:15	[216] Extending Log-Logistic IRT: A Multidimensional Model and Its Implementation in R	NAVARRO-GONZÁLEZ, David
09:30	[118] Exploring the Consensus Emergence Model as a Tool for Analyzing Intra-Individual Variability in Psychological Development	Dr DÍAZ-GUERRA, Alejandro Dr ANTINO, Mirko Dr BLIESE, Paul
09:45	[231] Alignment optimization and the sequential testing approach for data harmonization	OZCAN, Meltem
