

XI Conference – European Congress of Methodology

Wednesday 23 July 2025

Session 8 : "Psychometric evaluation in forced-choice tests" (10:00 - 11:30)

time	[id] title	presenter
10:00	[155] Empirical Evaluation of Psychometric Properties in Forced-Choice Tests: Comparing Binary and Graded Preference Formats Across Test Designs	
10:15	[238] Statistical foundations of person parameter estimation in the Thurstonian IRT model for forced-choice and pairwise comparison designs	
10:30	[223] Ipsative indices for forced-choice assessments	
10:45	[224] A fit index for latent class analysis of dichotomous scale	
11:00	[86] What ipsative measures can tell us about the General Factor of Personality	
11:15	[191] Optimal Design in Linear Paired Comparisons for Thurstonian IRT models
