

XI Conference – European Congress of Methodology

Thursday 24 July 2025

Session 14 : "Dynamic and temporal models in psychology" (08:30 - 10:00)

| time | [id] title | presenter |
|-------|--|-----------|
| 08:30 | [47] Towards a Clearer Understanding of Causal Estimands: The Importance of Joint Effects in Longitudinal Designs with Time-Varying Treatments | |
| 08:45 | [14] Investigating heterogeneity in temporal dynamics with a latent variable extension of time-varying coefficient models | |
| 09:00 | [212] Time-varying continuous-time models: Extending the framework for dynamic parameters that change over time | |
| 09:15 | [179] An investigation of the temporal dynamics of careless responding across different populations in experience sampling data | |
| 09:30 | [124] Mapping methodological variation in experience sampling research from design to data analysis: A systematic review | |
| 09:45 | [262] Beyond 'Accuracy': AI vs. Humans as Raters | |
